

Need new equipment? How can you save money?

The **Florida League of Cities Equipment Financing Program** is a cost-efficient way for local governments to finance their equipment needs.

ADVANTAGES OF THE EQUIPMENT FINANCING PROGRAM

Simple. Multiple types of equipment can be financed at one time.

Less paperwork. Local governments set up a master set of documents. Once the program is established, no additional master lease documents, bid documents or massive credit applications are required (subject to annual credit review).

Minimal staff time for your local government. As administrator, the League provides all documents, hires professionals and coordinates with the bank to obtain financing proposals. All documents have been pre-approved, making the process quick and efficient.

PROGRAM DETAILS

\$100,000 is the minimum amount financed for up to 10 years, depending on the life of the equipment. Types of equipment financed include vehicles (maintenance, rescue, fire engines, school busses and police cars), aircraft, furniture, computers and telecommunications, medical/technology and more.
